AME 13

Our classic entry-level electric pallet truck.

Easily optimised pallet transport.

The reliable and cost-effective AME 13 hand pallet truck is our reasonably priced entry-level model in the electric pallet truck segment. It is ideal for simple indoor tasks such as the daily transport of pallets in warehouses and stores.

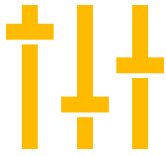

Thanks to its compact design and extremely low service weight, this pallet truck performs particularly well with maximum manoeuvrability in confined spaces and weight-sensitive environments. The robust frame, easy handling and maximum energy efficiency guarantee reliable performance.

Maximum availability is ensured by a lithium-ion battery, the performance of which can be increased even further thanks to the boost and opportunity charging function. Handling is easy thanks to the control panel, which is suitable for both left and right-handed operators.

All benefits at a glance

- Classic entry-level model for efficient pallet transport.
- Excellent manoeuvrability in confined warehouse areas.
- Powerful lithium-ion battery with easy battery exchange.
- Ergonomic control panel suitable for left-handed and right-handed operators.
- Reliable Jungheinrich quality with durable components.

Your Jungheinrich electric pallet truck for maximum customer benefits.

Individuality

A forklift truck as individual as your business.

May we introduce our classic electric pallet truck? The Jungheinrich AME 13. Thanks to stable construction and robust materials, this truck performs a wide range of transport tasks with impressive ease.

High stability

- Stable handling of the truck even with a full load due to support wheels.
- Tandem fork rollers in combination with protected entry rollers for comfortable picking up and depositing of pallets.

Efficiency

Maximum performance with the most efficient trucks.

Multi-shift operation, 24/7 operation or working with one battery while the second one is charging – no problem at all for our particularly efficient AME 13 electric pallet truck. Expect the highest performance with low operating costs!

Advanced lithium-ion technology

- Powerful lithium-ion battery for maximum availability and short charging times.
- Quick and uncomplicated battery exchange thanks to practical boltless system.

High cost efficiency

- Longer life cycles and maintenance-free operation.
- Efficient charging processes without expensive charging infrastructure.

Safety

Best conditions for working safely.

Get your internal material flow moving! With the AME 13 electric pedestrian pallet trucks, you are ideally equipped for efficient pallet transport – lifting, lowering and moving goods has never been so secure.

Safe operation

- Easy access to all truck components thanks to the open design of the driving and braking system.
- Optimum protection of controller and plugs against dust and humidity with IP 54 housing.

Precise navigation

- Ergonomically adapted tiller arm with clear colour coding and wear-resistant button icons for intuitive operation.
- Easy handling due to the control panel which is suitable for left and right-handed users.

Overview

The right solution for your applications:

Name	Load capacity/load	Travel speed unladen	Aisle width (pallet 800x1200 length)	Lift speed unladen
AME 13 (550x800)	1300 kg	5 km/h	1993 mm	0.03 m/s
AME 13 (550x1150)	1300 kg	5 km/h	2095 mm	0.03 m/s
AME 13 (685x1000)	1300 kg	5 km/h		0.03 m/s
AME 13 (685x1150)	1300 kg	5 km/h		0.03 m/s
